

ABOUT ME

I am a Web Designer/ Developer. I love building web applications from scratch so that I can understand every aspect of the development stage and how it all fits together. With every new project I ensure that I am using modern technologies and using the most efficient frameworks or libraries. When I am not building web applications I spend my time attending Martial Art classes and the Gym.

MY SKILLS

LANGUAGES

HTML5/ CSS3 ●●●●●
PHP/ MySQL ●●●●●
Javascript ●●●●●
Jquery/ AJAX ●●●●●

FRAMEWORKS

Angular.js ●●●●●

EXPERIENCE

CUSTOMER ADVISOR @ SUPERVALU

2014 - 2015

Using spare time to work on personal logo and website while working full time in unrelated position.

FREELANCE DEVELOPER

2015 - 2016

Began working on a project called Baked Delicious for a client which was a whole sale Cornish Pasty company. I carried out all development and design work.

PERSONAL DEVELOPING

2016 - 2017

Began learning Angular.js and Bootstrap.js. Spent one year travelling and working abroad in Australia and Thailand. Presently working on a project called Everything Backpacker. This is a personal project but uses all latest languages and frameworks and also uses a payment gateway.

EDUCATION

GCSE @ DOWN ACADEMY

2001 - 2006

7 GCSEs - Grade B-C including Maths

BTEC NATIONAL DIPLOMA @ BELFAST MET COLLEGE

2007 - 2008

Business - 3 distinctions

City Guild Certificate in GCSE English - PASS

BSC HONS DEGREE @ ULSTER UNIVERSITY

2010 - 2014

Interactive Multimedia Design (Computer Science) - second class honours upper Division

INTERESTS

DYNAMIC INTERFACES

I have a high interest in using AJAX in combination with PHP to create fast and dynamic web pages.

LESS CODE SAME OUTPUT

After learning Angular.js I have had a growing interest in frameworks that require less code for the same output, resulting in time saved, smaller file sizes and quicker results.

RESPONSIVE PAGES

I am learning more and more everyday to ensure that pages are always responsive across all major devices and browsers.

PERFORMANCE

Using websites such as GTmetrix to understand the websites performance and where the bottle necks of the application are. Making sure not to overload the browsers DOM when using JQuery.
